Accurate overview on up-to-date fixed assets information

Auspac Fixed Assets Management System is a powerful assets tracking program to save your time, reduce human errors, and eliminate tedious and repetitious tasks. It is designed to deal with all types of depreciation processes, keep details of acquisitions, additions, location movement and disposals.

Auspac's Fixed Assets module can be used as a stand-alone system in keeping track of company assets such as vehicles, property, plant, office equipment as well as its financial arrangements. Fixed Asset module provides all the information needed to monitor the assets accurately.

Auspac Fixed Assets system provides a real-time, accurate overview on all fixed assets information such as accumulated depreciation and net book value of assets. Well design user entry procedure helps to reduce data entry errors and easily reporting on fixed assets value and analysis

Auspac's Fixed Assets helps in saving the time on record keeping. The system allows to:

- ✓ Gain an immediate overview on cost and value of tangible fixed assets
- ✓ Improve on overall handling of fixed assets policy and treatment
- ✓ Enhance the efficiency in fixed assets management and maintenance
