Tailored ERP Solution for Textile and Garment Manufacturers of all sizes

Auspac Textile Management System provides you an instant view of your entire operation, where you have up-to-the-minute visibility of inventory movement, production operations, purchasing activities, customer billing information, and down to accounting functionality in details. Auspac ERP add-on modules are:

- Distribution Sub-system (Pre-Sales Costing, Booking, Sales, Inventory, Purchasing, Shipping, Business/Quotation Manager),
- Production Sub-system (Barcode System, Dyeing Job Card Processing, Color Dyeing Recipe, Dyestuff Inventory, Dyed QA/QC, Dyed Packing/Weight Labeling, Knitting Specification, Knitting QA/QC, Knitting Packing/Weight Labeling, Garment Planning, Garment Cutting, Garment Production, EDI, Sub-Con Module, Master Production Schedule)

We have always recognized that not all textile businesses are the same, and we have ensured that this is reflected within the software. We offer many benefits of a customized package with a high level of flexibility, such that product codes, documents formats, screen layouts, labels and reports that can meet your requirements without many changes are required within the underlying software. This tailored solution gives your business the maximum benefits of a total integrated manufacturing management system. It provides textile manufacturers with the key information required for controlling the financial, logistical, operational and administrative issues necessary for a smooth running, efficient business in today's highly competitive environment.
